[1. RFA-HD-16-006 : Tools for Assessment and Improvement of Neurologic Outcomes \(R41/R42\)](#)

Release Date: 08-12-2015 Open Date: 11-10-2015 Due Date: 12-10-2015 Close Date: 12-10-2015

Background Improving pregnancy outcome is a prime mission for Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD). Neonatal neurologic disease contributes a significant burden to patients, their families and society. Neonatal encephalopathy (NE) affects up to 3.3/1000 term and late preterm infants in the developed world. Hypoxic ischemic encephalopathy (HIE), a ...

[3. 001: Small Business Innovation Research \(SBIR\) to Develop New or Improved Closed Loop Automated Technologies for Diabetes Therapy and Monitoring \(R43/R44\)](#)

Release Date: 07-24-2015 Open Date: 10-18-2015 Due Date: 11-18-2015 Close Date: 11-18-2015

Type 1 diabetes (T1D) results from the autoimmune destruction of the insulin-producing cells of the pancreatic islets of Langerhans and affects more than one million Americans, usually with onset in childhood or young adulthood. The disease markedly impairs quality of life and shortens lifespan primarily through premature mortality. T1D is associated with numerous complications including bli ...

[4. 001: Tools for Monitoring and Manipulating Modified RNAs in the Nervous System \(R43/R44\)](#)

Release Date: 07-21-2015 Open Date: 10-18-2015 Due Date: 11-18-2015 Close Date: 11-18-2015

Background Chemical modifications play a crucial role in the regulation of biological processes. For example, the function of a protein is often modulated by its stable tagging with phosphates, sugars, or lipids, while epigenomic marks on DNA or histones can help dial gene expression up or down. One area that lags behind is the systematic characterization of all the chemical modificati ...

[6. 001: Small Business Innovation Research \(SBIR\) to Develop New Methods and Technologies for Assessment of Risk and for Early Diagnosis and Prognosis of Type 1 Diabetes \(T1D\) \(R43/R44\)](#)

Release Date: 07-28-2015 Open Date: 10-18-2015 Due Date: 11-18-2015 Close Date: 11-18-2015

Early identification of T1D risk and the onset of autoimmunity provide the basis for a variety

of major ongoing studies seeking to prevent or delay the disease. Already, research on the natural history of the development of T1D in at-risk neonates has shown that early identification of those at risk can foster early diagnosis of T1D and avoid life-threatening diabetic ketoacidosis (DKA).&nbs ...

[7. RFA-HL-15-019: HHS SBIR RFA-HL-15-019](#)

Release Date: 04-15-2014Open Date: 10-16-2015Due Date: 11-16-2015Close Date: 11-16-2015

Purpose The objective of this Funding Opportunity Announcement (FOA) is to support the development of devices to evaluate dynamic changes in microvascular blood flow and tissue oxygenation. Devices designed to measure temporal changes in regional perfusion and oxygen delivery following red blood cell transfusion or in peripheral vascular disease are of particular interest. This FO ...

[8. 001: Open Design Tools for Speech Signal Processing \(R43/R44\)](#)

Release Date: 09-01-2015Open Date: 09-01-2015Due Date: 10-01-2015Close Date: 10-01-2015

Purpose This Funding Opportunity Announcement (FOA) seeks applications to design, test, and disseminate acoustic signal processing tools that have the potential to accelerate research studies and facilitate translation of novel algorithms into use with hearing aids, cochlear implants, personal sound processors, and consumer electronic devices. Background Open hardware and software designs that are ...

[9. CDC/NCIRD 032: Thermostable Dry Powder Live Attenuated Influenza Vaccine for Nasal Delivery](#)

Release Date: 07-24-2015Open Date: 07-24-2015Due Date: 10-16-2015Close Date: 10-16-2015

Background Ongoing disease and death associated with seasonal influenza and the threat of an influenza pandemic are two of the highest priority issues for global public health. Vaccination is a powerful tool for preventing influenza, however, current vaccines have several limitations. Inactivated influenza vaccines (IIV) given by needle injection require skilled health care workers and can lead to ...

[10. NIH/NCI 341: Development of Metabolomics Data Integration Methods and Software](#)

Release Date: 07-24-2015Open Date: 07-24-2015Due Date: 10-16-2015Close Date: 10-16-2015

Metabolomics is the study of small molecules participating in cellular metabolism. Advances in metabolic profiling technologies have made it possible to simultaneously assay hundreds of metabolites, providing insight into an organism's metabolic status.
